

CropCare

LandMagic CropCare is a caretaking solution for improved management control and communication of activities specifically designed for Agriculture.

CONTROL YOUR CARETAKING

LandMagic CropCare allows you to maximize productivity and increase efficiency of all your caretaking activities. Simplify caretaking by creating work orders, scheduling job activities, tracking materials and equipment, and approving work orders all in one, easy to use system.

Create Job Schedules to create multiple Work Orders. With CropCare's Job Scheduling application, you can easily create multiple work orders and plan your caretaking needs on an easy to use calendar view.

Avoid potential accidents and keep workers safe with Restricted Use Chemicals & Compliance, Manufactures Product Label, Worker Protection Standards, and Material Safety Data Sheets.

With tight regulations, it's important to have all the information you need at your fingertips. Keep your workers safe. Print and post hazardous materials data quickly and easily.

LandMagic CropCare is a web-based application that allows access from any location with Internet connection, any operating system, at any time. Web-based also provides users with quick, secure login to CropCare and the comfort of knowing your data is safe. Multiple language support enables users to view the application in English, Spanish, Chinese, and Portuguese.

BENEFITS OF CROPCARE

-  Maximize efficiency of your asset and resource deployment
-  Communicate via internal network of a variety of mobile devices
-  Manage equipment, maintenance costs and inventory tracking
-  Track project completion, total acres, and completed blocks

EXTEND DIRECTLY TO THE FIELD WITH MOBILEMAGIC CROPCARE

MobileMagic CropCare allows you to update scheduled work orders in real time from the field. With device flexibility, barn managers and supervisors can approve work orders as they are completed. Device flexibility offers integration with a variety of data collection hardware to successfully track all aspects of your farming operation. It's that simple.

EXPERIENCE TOTAL CONTROL WITH GEOMAPS

CropCare, integrated with GeoMaps, allows users to access live images of their land using Bing[™] Maps for a bird's eye view of actions taking place on each block and/or parcel, all from your web browser. See a color-coded map of caretaking activities occurring that day.
