Harvesting

LandMagic Harvesting is a system that manages all aspects of harvesting. Take control of your harvesting operations and track performance indicators of blocks and labor in real-time.

Manage Your Harvesting

You nurture and invest in your crop all season long, don't stop at harvest. Transform your agriculture operations to its full potential. With LandMagic Harvesting, you are in control and capture the following value-added benefits:

Increase productivity and make your harvesting activities more efficient. LandMagic Harvesting is a new harvest management tool that allows growers to actively manage all aspects of harvest and track the key performance indicators of your blocks and contract labor.

Harvesting gives you the ability to create harvesting schedules and tickets from your office, truck or preferred mobile device via the Internet. You now have the freedom of accessing your harvest data from anywhere with an Internet connection. Creating schedules and tickets is quick and simple.

Manage harvesting schedules by date, variety, Land ID, and block. Keeping track of your harvesting data with all the necessary details provides better organization.

LandMagic Harvesting was developed by a team devoted to agriculture. At ProPak Software, we understand the need for flexibility in today's agricultural environment and have developed Harvesting to operate with a wide variety of data collection devices. Additionally, Harvesting data can work together with your existing accounting system.

Benefits of Harvesting

- Create harvesting schedules and tickets from anywhere
- Provide key harvesting data to forecast your crop and review harvesting demand.
- Manage multiple crop types and multiple varieties
- Import harvesting data into your existing payroll systems

LandMagic Harvesting is a web-based application that allows access from any location with Internet connection, any operating system, at any time. Web-based also provides users with quick, secure login to Harvesting and the comfort of knowing your data is safe. Multiple language support enables users to view the application in English, Spanish, and Chinese.
